For Immediate Release

IIJ Launches New Software Product for Efficient Document Sharing : SlicePoint
---Full-text search, preview, and download functions make document sharing fast and convenient---

TOKYO--February 18, 2014--Internet Initiative Japan Inc. (IIJ, NASDAQ: IIJI, TSE1: 3774), one of Japan's leading Internet access and comprehensive network solutions providers, today announced the release of SlicePoint, a software package, which allows users to perform full-text searches of PDF, PowerPoint, and other file types, view the data in an online preview, and download the files. SlicePoint can be used on an on-premise network, a private cloud, or an IaaS like IIJ GIO Service.

Enterprises currently share a myriad type of documents--reports, meeting minutes, proposals, and specifications-- on the corporate portal site or file server. However, in such a situation, it is time consuming to find the required documents in the sea of corporate documentation. SlicePoint enables users to avoid trouble finding and make document retrieval fast and convenient.

SlicePoint has simple features to provide a user-friendly operability.

Full-text search
In addition to attribute-search such as on tags, author, and registered people, full-text search of document contents is also available. This makes it possible to find the files that users need from among a huge volume of files.

Online preview
The documents turned up in searches can be viewed in their entirety online. No need to download and open a file to know if it is the right one, so the target document can be located more efficiently.
Three preview modes to choose from
1. Display all found documents in a list
2. Display all pages of all found documents
3. Display only pages that contain key words

Download
Users are able to select the necessary files from the preview and download them all at once. A thumbnail of each select page is created, and downloaded with the document itself.

IIJ will continue to develop high value-added applications that solve a range of issues for our customers' business environment.

SlicePoint Features

File registration
Search (by tag, full text, attribute)
Preview
Download
Rating
Access restriction settings (registered people only, all users, group)
